

# Guilherme Gonçalves

Senior Software Engineer

## PROFILE

Senior Software Engineer with 10+ years taking products from idea to production — architecture, MVP delivery, scaling, and operations at global scale. Work at the intersection of engineering and product, caring equally about user outcomes, business impact, and system design. Comfortable owning full problem spaces end-to-end, shipping things that matter — fast and with quality.

## EMPLOYMENT HISTORY

### Senior Software Engineer at Varsity Tutors — Nerdly

Remote

Nov 2023 — Present

- Built and maintained customer-facing systems end-to-end — from React front-ends to Ruby/Python back-ends and AWS infrastructure — helping millions of students connect with tutors for seamless tutoring sessions.
- Owned tutor-matching and onboarding systems across a TypeScript, Go, Python, and Ruby stack.
- Drove 7-day session rate to **75 %**; cut tutor replacements before first session from **25 %** → **<10 %**.
- Integrated CI/CD quality gates; introduced AI-assisted dev workflows that accelerated delivery and improved test coverage.

### Senior Software Engineer at IKEA

Amsterdam, Netherlands

Oct 2022 — Nov 2023

- Architected and delivered the **ElectricitySubscription** platform — hire, manage, and simulate energy subscriptions across partner markets.
- Sole owner of CI/CD infrastructure (GitHub Actions + Terraform, mono-repo).
- Built gRPC, GraphQL, and REST services on GCP in Node, TypeScript, and Go.
- Designed domain-level data models and defined e2e test strategy.

### Backend Software Engineer at DAZN Group

Amsterdam, Netherlands

Nov 2020 — Sep 2022

- End-to-end ownership of **PasswordReset**, **UserProfile**, and **DeviceService** — high-traffic microservices serving millions of users globally.
- Designed cloud architecture; managed all infra as code with Terraform (AWS Lambda, SQS, SNS, Fargate, DynamoDB).
- Built NewRelic observability dashboards that became the team standard.
- Created unit, integration, and e2e tests.

### Full Stack Engineer at DBServer

São Paulo, Brazil

Nov 2018 — Nov 2020

- DASA**: Led development of a data-provider platform (Java/Spring, AWS/Azure) consolidating exam, lab, and insurance data via REST APIs.
- Klabin**: Shipped 3 MVPs in 4 months — real-time PWA, forest-navigation mobile app, and OCR-based similarity tool — each delivering measurable cost savings.

### Node.js Backend Developer at Ditto Music

São Carlos, Brazil

May 2018 — Nov 2018

- Migrated PHP monolith's media-file layer to a Node.js microservice on AWS, reducing infrastructure costs.

**Software Developer** — Code4business Software GmbH, Aachen, DE (2017–2018) · Java GIS system

**Java Software Developer** — Monitora Soluções Tecnológicas, São Carlos, BR (2016–2017) · VistaJet GlobalView

## SIDE PROJECT

### Zapeai — Founder & Engineer

Jan 2024 — Present

Subscription management platform for small businesses. WhatsApp-integrated communication to reduce payment delinquency, automated payment systems, and data analytics for client decision-making.
